

Education!

By Tony Banning

There's more to choosing a course of study than evaluating what goes on in the classroom. By their very nature, institutions of higher learning do much to enhance their hometowns. But what about the way a place affects the educational experience? While increasingly popular distance-learning options make it easy to learn from the comfort of your own home, when selecting an on-campus educational experience, students and parents alike should also consider lifestyle, the natural environment and recreation. This edition of *SkyWest Magazine* features some of the nation's best academic programs, each situated in a place that's a worthy destination in its own right. Here's a brief sample of why we rank these collegiate environments among America's Best Places.

We love regional appeal: Iowa City, home to the University of Iowa and its famed Writer's Workshop, exudes Midwestern warmth. Rock Island, Illinois offers students at Augustana College the rich heritage of a consummate Mississippi River town while Auburn, Alabama, and the university of the same name, are both awash in Southern gentility and surrounded by forests, peaks, plains and savannahs that beg exploration. Las Cruces, New Mexico radiates Old World Spanish charm and cultural diversity. California State Los Angeles' proximity to Pasadena, one of the brightest stars in SoCal's enrichment constellation, means old-school California allure as well as big-city fun.

Natural Wonders Entice Us: Cal State Fresno sits at the gateway to Yosemite National Park. Bozeman, site of Montana State University, offers easy access to Yellowstone National Park and Big

REFUEL YOUR CAREER WITH THE BEST, ANYWHERE IN THE WORLD.

The Executive MBA Programs at Auburn University can fuel your career without grounding your schedule.

Ranked among the world's best by the *Financial Times* of London, the programs feature a uniquely flexible blend of advanced curriculum delivery and short campus visits.

Take your career to new heights.

Sky Country. Utah's red-rock wonders surround Dixie State College in St. George. Nearby, Cedar City and Southern Utah University nestle in the high desert and are just a quick drive from Zion and Bryce national parks. The University of Idaho's hometown, Moscow, is an oasis of enlightenment surrounded by the Pacific Northwest's fabulous Palouse. Colorado Mountain College's seven locations are sprinkled throughout the Central Rockies near some of America's finest ski areas. Fort Lewis College in Durango, Colorado fosters adventure where the Rockies meet the southwest's canyon lands. The University of Arizona in Tucson delivers Sonora Desert wonders.

The Beach, the Mountains, the Plains = Outdoor Recreation: Students at the University of California Santa Cruz enjoy quality education in a town nicknamed Surf City. Need we say more? Those matriculating at Cal State Monterey Bay experience a fabulous coast with a heritage steeped in the arts as well as science. The Midland School's Santa Barbara location reflects California's ranching legacy, and profits from one of its loveliest seascapes. Boise State benefits from the bustle of Idaho's state capital, surrounded by miles of foothill trails ideal for hiking and mountain biking. A river runs through campus luring fishermen and rafters. The University of Nebraska's various campuses are all near buttes, prairies and plains that mean fun for outdoorsmen. Colorado's Front Range holds plenty of hiking, biking and rock-climbing options for students at Colorado State University in Fort Collins and those attending the University of Northern Colorado in Greeley. Both cities are less than an hour's drive from Denver's major metro appeal.

These highlights offer just a taste of the many reasons to visit these locations. To find out more, check out the websites listed in the following pages.

THIS IS YOUR WAY FORWARD.

This is your opportunity to expand your horizons, gain the skills you need to be successful, become a leader. The University of Idaho offers professional degree programs including Executive MBA, Professional Science Masters and J.D. in law. This is your chance to connect with a community to move your career forward. Be a part of it. Join the legacy of leading.

University of Idaho

www.uidaho.edu/futurestudents | A LEGACY OF LEADING

Ranked among the world's best Executive MBA Programs in 2010 by the London *Financial Times*, Auburn's AACSB accredited EMBA Programs are designed with your busy world in mind. The General Program, aimed at mid and upper-level professionals, and the Physicians Only Program utilize a unique blend of technology and short campus visits that allow you to study virtually anytime, anywhere.

The keys to Auburn's EMBA Programs are quality and flexibility. The curriculum is designed for immediate applicability in the workplace. Our mixed delivery system uses five, one-week on-campus residencies during the 21-month program; lectures on iPads; Internet discussions; and international study, affording students both real-time interaction with faculty and fellow classmates, and the flexibility of a self-paced distance program without career interruption.

Auburn University is a special place, with special people, and special programs. People often talk about the Auburn "family." It's an appropriate designation. Once you become a part of this institution, you become part of a family with more than 230,000 relatives all over the world—ready to welcome you with a heartfelt "War Eagle!" Don't put life on hold—advance your career with an Auburn Executive MBA.

877-AUB-EMBA | www.aubemba.org

Our pre-health profession programs are second to none. Whether you want to be a doctor, dentist, veterinarian or a physical therapist, Augustana's faculty will give you one-on-one preparation that will make you stand out in professional school.

Students with a pre-health-profession focus gain invaluable hands-on experience in our on-campus human cadaver lab. That experience has led to Augustana graduates being accepted to professional school at a much higher rate than the national average.

Augustana has a long-standing relationship with the University of Texas MD Anderson Cancer Center, where our students complete research internships. Our pre-vet students take advantage of the only guaranteed and early acceptance agreement offered by the University of Illinois School of Veterinary Medicine. For students focusing on pre-dentistry, we have had tremendous success placing graduates at the University of Iowa College of Dentistry, among other top dental schools throughout the country.

Augustana is a private, selective liberal arts college of 2,500 students located on the shores of the Mississippi River. We offer more than 70 majors and related areas of study.

Call or visit our Website for more information. Mention *SkyWest Magazine*, and we'll pay for your flight to visit campus, if you have applied and are seriously considering enrolling.

800-798-8100 | admissions@augustana.edu | www.augustana.edu

Boise State University

BOISE, ID

You are invited to "Innovate@BoiseState" where campus is teeming with creative new ideas, exciting partnerships and fantastic opportunities. In fact, Boise State University has been ranked among the nation's "top up-and-coming schools" in *U.S. News & World Report's* (2010) "America's Best Colleges" issue.

New buildings, record enrollment, expanded academic offerings and Idaho's fastest growing research program are all signs of Boise State's emergence as one of the top public institutions in the Northwest. Boise State is the largest university in Idaho with nearly 20,000 students.

About 165 academic programs are offered in the colleges of Arts and Sciences, Business and Economics, Education, Engineering, Graduate Studies, Health Sciences, and Social Sciences and Public Affairs. The campus is home to 11 Idaho Professor of the Year honorees by the Carnegie Foundation since 1990 and a national award-winning student debate and speech team.

Campus life provides adventure and activity with more than 200 student organizations. Students live in new residence halls along the Boise River and exercise in the \$12-million Student Recreation Center. Located in the heart of Idaho's commercial, cultural and civic capital, campus is within walking distance of downtown. Nearby outdoor activities are endless with skiing, climbing, hiking and mountain biking.

800-824-7017 | 208-426-1000 | www.boisestate.edu

California State University, Fresno

FRESNO, CA

In 1911, California State University, Fresno began with 150 students as a two-year, state normal school focused on preparing teachers. Now, 100 years later, Fresno State has matured into an acclaimed, culturally diverse, 21st-century university that offers educational opportunities for students throughout Central California.

As the region's leading university and a center of intellectual and cultural activity, Fresno State is proud to celebrate our centennial year as we continue our commitment to develop qualified professionals who will become tomorrow's leaders in every walk of life.

Our 21,000 students select from challenging and innovative programs in the liberal arts and sciences, in the professions, in applied fields, and in special and interdisciplinary fields of study. When they graduate they apply what they've learned as leaders and doers in communities throughout California, around the world and even into space.

Our alumni are 9/11 heroes, ambassadors, teachers, agribusiness leaders, doctors and nurses, political and civic leaders, business executives, authors and artists, astronauts and professional athletes. They've won the Pulitzer Prize, Oscars, Olympic medals, Emmys, Grammys, the Super Bowl and other distinctions.

On our 100th birthday, we're proud of our past and look forward with great expectations to an even brighter future.

559-278-4240 | www.fresnostate.edu

The College of Engineering, Computer Science, and Technology (College of ECST) is committed to graduating well-educated professionals who are prepared to meet the challenges of a rapidly changing world. With in the five departments—Civil Engineering, Computer Science, Electrical and Computer Engineering, Mechanical Engineering and Technology—the college offers 12 undergraduate programs, two teaching credentials as well as four Master of Science degrees and one Master of Arts degree in Industrial and Technical Studies.

Undergraduate and graduate research opportunities are available through research laboratories such as S.P.A.C.E. Laboratory, NASA University Research Center, Environmental and CE&A CREST Laboratory, and the Naval Seafloor Laboratory.

We proudly educate highly skilled engineers, computer scientists, and technologists who are working for global corporations. *U.S. News and World Report* (2010) ranks the College of ECST among the ten best public undergraduate (non-Ph.D.) engineering programs, west of the Mississippi.

This ad was made possible by The Friends of Engineering, Computer Science, and Technology founded in 2009 by Dr. Warren Valdry. The core mission of this organization is to create a network of alumni, friends, and industry representatives who support the vision of the College and assist in continuing to provide exceptional research experience opportunities to all students.

323-343-4500 | www.calstatela.edu/academic/ecst/

Students at California State University, Monterey Bay receive an excellent education—and so much more—in a spectacular setting that borders the Pacific Coast and the beautiful Salinas Valley. Our broad curriculum, geared for the 21st century, emphasizes hands-on learning, real-world application, student research and cutting-edge technology to prepare graduates who make the most of their opportunities. We provide an acclaimed program of service learning, offer varied internships, and enable seniors to culminate their major with a “capstone” experience. A diverse enrollment of close to 5,000 students allows for small class sizes so faculty can provide

individualized instruction.

Our 18 undergraduate majors range from environmental science, film and interactive media to business administration and psychology, and we offer eight graduate degrees in such relevant fields as marine science, social work and education. Facilities include a top-notch science center and a new state-of-the-art library. Nearly 60% of students live on campus. Extracurricular opportunities include an array of student organizations and 13 sports in NCAA Division II. The region offers abundant cultural activities and outdoor recreation, and the Monterey Peninsula is just minutes from campus. At CSUMB, we are committed to the success of every student—and we are committed to excellence.

831-582-5100 | csumb.edu

Colorado Mountain College

COLORADO

Life is different at Colorado Mountain College. And so is learning. There are 12,000 square miles of Rocky Mountain classroom space, plus eleven campus locations. Students have many options. They photograph world-class landscapes, learn the ski and resort business, sample water, cook in four-diamond restaurants, and sharpen leadership skills in the wilderness.

Academically, students are prepared to go anywhere, earning highest honors at major universities and working on doctorates in astrophysics, DNA sequencing, international relations and medicine.

Colorado Mountain College has three, full-service residential campuses in Steamboat Springs, Leadville and near Glenwood Springs. Additional campuses provide other study options in subjects such as solar energy and sustainable cuisine.

With a low student-to-teacher ratio, the learning experience is more what you would expect from a private college. The type of student who is attracted to this style makes for an energizing mix in the classroom. You might be learning alongside Olympic athletes, or someone who is restoring historic buildings of the Old West.

With million-dollar campus views, proximity to 16 of Colorado's ski areas and an outdoor-oriented approach that landed it in *Backpacker Magazine's* top five, it's hard to imagine a more compelling place to go to college.

Colorado Mountain College is an invigorating blend of mountain life and mountain learning.

800-621-8559 | www.ColoradoMtn.edu

Colorado State University

FORT COLLINS, CO

Colorado State University's Professional MBA Program offers flexibility and convenience for career-minded professionals. Our program is offered on-campus and at a distance. With lectures delivered via DVD and video streaming, Distance MBA students around the world receive the full classroom experience. The content for each course is not just archived as it is with most online offerings. Rather, our distance program allows students to view all lectures, student discussions, presentations and guest speakers just hours after they have occurred. Our unique method of delivery offers students a personal connection to our campus, students and educators, yet allows them to *CONNECT Anywhere, Anytime, Anyplace.*

AACSB accredited since 1970, our MBA program provides the tools you need to advance your career, earning a degree that is held in high regard by employers and peers. Whatever your background, our integrated MBA curriculum will develop your business knowledge and inspire you to be a leader.

The flexibility of the Distance MBA Program allows you to earn your degree in 21 months or complete it in up to five years. Students may begin the program in the fall or spring of each year, with no residency requirements impacting admission or tuition rates. Distance MBA students earn a Master of Business Administration from Colorado State University, not one designated as an online or distance degree. Distinguish yourself from the competition.

800-491-4622 ext.1 | www.CSUma.com

Dixie State College

ST. GEORGE, UT

Dixie State College of Utah is bridging to a new century of high quality, low-cost education that provides students with knowledge, skills, and opportunities to make their mark. Whether their dreams include medical school, an invitation to the Cannes Film Festival, or winning the coveted Kennedy Center National Collegiate Actor's Award, Dixie State students make the grade.

Currently, Dixie State students can earn baccalaureate degrees in 16 areas of study in core or foundational programs consistent with four-year institutions. Dixie State's new mission will pave the way to the addition of more bachelor's degrees in the coming years. In addition, Dixie State is a community college that offers a number of associate degrees and certificate programs.

Dixie State is focused on student success in a community setting. Small classes, teaching professors and free tutoring all support student success in class. An involved student government provides students with a structure that fosters opportunities for rewarding service projects. Strong intramurals, 113 clubs, an active outdoor recreational center, and competitive NCAA Division II intercollegiate athletics provide a menu of positive, healthy, life choices for nearly 9,000 students. Educational opportunities in the classroom and outside the classroom work together to build strong student bridges to success.

435-652-7500 | www.dixie.edu

Fort Lewis College

DURANGO, CO

At Fort Lewis College, we believe college is an adventure.

Our adventurousness is inspired by our location, where the rugged Rocky Mountains meet the Southwest's canyons and deserts—a fantastic landscape that is both playground and living classroom. The American Southwest has also long been a cultural crossroads. With students from 45 states, 20 countries and 125 Native American tribes and Alaskan villages, we don't just talk about diversity, we live it. We practice it. We treasure it.

Here, we adventure together. That's because our small class sizes ensure our fabulous faculty can be caring mentors and engaged guides. And our liberal arts curriculum urges you to explore and expand both your mind and your world.

And we also adventure outside the classroom, in real-world experiences and with a spirit of community service. Through internships, undergraduate research, service learning and individual enterprise, our students actually apply their coursework in positive endeavors. And when they graduate, they carry with them a Civic Engagement Transcript, a quantifiable and officially recognized listing of experiences and achievements in participatory community work both in and out of classes.

Because at Fort Lewis, college is an adventure. Believe it.

877-FLC-COLO | www.fortlewis.edu

Midland School

SANTA BARBARA COUNTY, CA

Founded in 1932, Midland School is a coeducational, college preparatory boarding school for grades 9-12. It is located in Santa Barbara County on a 2,860-acre working ranch.

The school combines rigorous academics with intensive immersion in the environment, and maintains a commitment to authentic student leadership, diversity, simplicity, self-reliance and environmental stewardship.

Through curriculum, sustainability projects, a job system and everyday conversation, Midland develops students who are self-reliant, respectful of the natural world, capable of leading others and equipped with the knowledge and skills to affect change. It is the blending of the coursework and ecological practices at Midland that makes this school unique. In addition, Midland offers competitive athletics, an equestrian program, arts and metals programs and countless extracurricular clubs and activities.

Ultimately, Midland students learn that they can make a difference in their communities, a vital quality in a society that desperately needs people who care about the world they have inherited and in turn will pass along to future generations. Midland graduates attend some of the most selective colleges in the country including Yale, UCLA, USC, Brown, Swarthmore, Colby, Stanford and Whitman. Midland currently enrolls 90 students and employs 20 teachers, all of whom live on campus.

"In such a small, supportive community, students' presence and advice is acknowledged and heard, effectively bridging the gap between the faculty and students," said Mariah Chen, School Prefect and Class of 2011.

805-688-5114 | www.midland-school.org

Montana State University

BOZEMAN, MT

Montana State University in Bozeman inspires big ideas and bold adventures. Expertise in alternative energy, paleontology, filmmaking, snow science, and sustainable food and bioenergy systems has earned MSU a reputation for extraordinary educational opportunities.

The university's innovative research and inquiry-based curriculum encourages exploration and creativity. MSU is designated as one of only 96 research universities—out of 4,400 institutions—with "very high research activity" by the Carnegie Foundation for the Advancement of Teaching.

Its abundant research in Yellowstone National Park is why MSU is known as University of the Yellowstone®. Many studies involve microbial life in Yellowstone's thermal features, while other projects explore wolves and climate research. The park's unique features also inspire artistic and literary projects.

MSU is Montana's land-grant institution with an enrollment of 13,559, a student-faculty ratio of 16:1 and more than 120 degree programs in agriculture; arts and architecture; business; engineering; education, health and human development; letters and sciences; nursing; liberal studies; two-year programs; and graduate studies.

The academic advantages at MSU are equaled only by the area's recreational opportunities. With three ski resorts within 45 miles, blue ribbon fly-fishing and the culture of a college town, Bozeman is frequently recognized for offering a high quality of life by publications like *Outside* magazine.

888-678-2287 | Montana.edu

Situated between the picturesque Mesilla Valley and the majestic Organ Mountains in southern New Mexico, NMSU offers excellent opportunities for intellectual pursuits and scientific exploration in the classroom, in labs and out in the field.

At NMSU, dedicated professors and motivated students work together to generate solutions to today's challenges. Multi-disciplinary research produces results that transform the lives of the residents of New Mexico and far beyond.

Our research activities include aerospace, agriculture, immunology, nanotechnology, and natural resource conservation. Another area of focus is alternative energy. Considered one of the top universities in the nation for algae research, NMSU boasts an algal bioenergy program. Our scientists are researching algal biomass as an economically feasible, sustainable substitute for fossil fuel. Turning microalgae into a successful fuel industry could provide a more stable and secure energy source, pump new money into the economy and create hundreds of thousands of jobs.

Such research opportunities are just one example of NMSU's learning-centered environment. Our nationally recognized faculty give students the resources they need to achieve their best and meet their academic and personal goals. As New Mexico's land-grant university, we are proud to serve a diverse population of students and community members across the state.

575-646-0111 | nmsu.edu

Southern Utah University in Cedar City, Utah, is unique in the region for its academic offerings, extracurricular opportunities and close-knit campus environment that offers something uniquely valuable to every one of its nearly 8,000 undergraduate and graduate students.

As a public institution, SUU offers the personal attention, hands-on experiences and small classes you'd expect from a private, liberal arts school at just a fraction of the cost. SUU's faculty have earned the reputation as cheerleaders to their students, targeting individual student interests and strengths as they teach and mentor. Additionally, the university offers more opportunities for undergraduate research, student leadership, service-learning and international study-abroad partnerships than students are afforded at larger institutions.

Though SUU's academic opportunities are widely varied, they all have one common quality: a standard for excellence. The quality of students, faculty and staff at SUU is one that few other colleges can boast, and SUU has been named as one of the "Best in the West" by the *Princeton Review* for seven consecutive years. This recognition places SUU in the top 25% of all universities and colleges in the nation.

465-586-7741 | www.suu.edu

The University of Arizona, as a premier public research university, provides a comprehensive, high-quality education that engages our students in discovery through research and broad-based scholarship. Quality, access and discovery are the defining attributes of the University of Arizona's mission in teaching, research, outreach and student engagement.

The UA offers a wide variety of academic programs, many of which are among the nation's best. Students choose from 300 undergraduate and graduate degree programs through 19 colleges. More importantly, UA has programs that match future job projections—a critical component as students consider their future career paths. When students attend the University of Arizona, they are making an investment in themselves—an investment that pays off, as demonstrated by the UA's ranking as the "Best Return on Investment" in Arizona.

Surrounded by mountains and with 350 days of sunshine, the UA is located in central Tucson. The UA mall is lined with palm trees and populated with students studying, sun bathing, and of course playing pick-up-games—football, soccer, and Frisbee are staples. Students live in residence halls that practice sustainable living and green initiatives. And with over 550 clubs and organizations to choose from, students easily form lifelong friendships.

Visit our campus! It's the best way to learn about the University of Arizona.

www.arizona.edu | Admissions: 520-621-3237 | admissions.arizona.edu/visit

University of California, Santa Cruz

Located a half-hour's drive from the heart of Silicon Valley and overlooking the Pacific Ocean, UC Santa Cruz is an acclaimed public research university with an uncommon commitment to undergraduate education.

Since its founding in 1965, UC Santa Cruz has earned national and international recognition for quality research and world-class teaching. *The Times of London* recently ranked UC Santa Cruz 68th on its list of the world's top universities for 2010-11.

Its renowned faculty includes two dozen members of the prestigious American Academy of Arts and Sciences. Its alumni include five Pulitzer Prize winners and the first female astronaut to walk in outer space. UC Santa Cruz is home to the world's most comprehensive genome database, visited three million times each week by researchers from all over the globe. It is a recognized leader in marine science, linguistics, economics and is home to the nationally acclaimed Shakespeare Santa Cruz theater company.

More than 16,000 undergraduate students have access to 63 majors in the arts, engineering, humanities, physical, biological and social sciences. UCSC offers doctoral and master's degree programs in 34 fields.

University of Idaho

MOSCOW, ID

The University of Idaho is an established leader in higher education in the state of Idaho and is one of the top public research universities in the Northwest. It is known as a destination for top students and for its ability to develop successful graduates.

The University currently enrolls nearly 12,000 students in 135 undergraduate and graduate programs. Idaho offers a transformative learning experience where students are challenged to expand their horizons and learn by doing. Their engagement and commitment to community shows in the recognition they receive as volunteers who help others around the globe. For the fourth year in a row, Idaho students have earned a place on the President's Higher Education Community Service Honor Roll for a commitment to volunteering and civic engagement.

The University is the state's flagship research institution and Idaho's only institution to earn the prestigious Carnegie Foundation distinction for high research activity. That means our students have unparalleled opportunities to work with world-class professors and take part in groundbreaking research and creative activity.

Our 120-year history has produced more than 100,000 graduates who contribute to the University's legacy of leaders. We are a connected community, dedicated to serving our state and educating tomorrow's leaders.

88-88-UIDAHO | www.uidaho.edu

The University of Iowa

IOWA CITY, IA

Home of the world-renowned Iowa Writers' Workshop, the National Advanced Driving Simulator, and one of America's best hospitals, The University of Iowa is a comprehensive public university committed to teaching, research, and public service.

Founded in 1847, Iowa today enrolls about 30,000 students, making it one of the smallest and most accessible schools in the Big Ten Conference. It's located in a casual yet cosmopolitan community widely recognized as a quintessential college town—in short, a perfect place to live, study, and work.

For 75 years, Iowa's pioneering creative writing programs have produced some of the world's most-acclaimed authors. The university's medical school boasts leading programs in a range of specialties, including otolaryngology, ophthalmology and orthopaedics departments that rank among the top 10 in their fields.

In education, Iowa offers big-school opportunities in a close-knit setting—well over 100 areas of undergraduate, graduate, and professional study across 11 colleges. In 2010, it ranked 29th among U.S. public universities on *U.S. News & World Report's* top college roster. It's also one of the country's best tuition values.

An economic engine for Iowa, the university generates about \$6 billion in economic impact every year—nearly \$16 for every \$1 in state funding. And its winning Hawkeye athletic teams have rallied fans everywhere.

Visit The University of Iowa online to learn more. Better yet, visit in person.

800-553-4692 | www.uiowa.edu

University of Northern Colorado

Bringing Education to Life

If you're looking for a university where your professors will know you by name and where you'll feel comfortable, then our campus may be just right for you. UNC is small enough to be personal and welcoming, yet big enough to offer rich, diverse opportunities. No matter which of our more than 100 educational programs you choose, your education will be rich with current information and knowledge.

At the University of Northern Colorado, education is about sharing knowledge, gaining a more thorough understanding and applying what we learn to real life. It's about realizing that knowledge can deliver richer, more rewarding experiences.

A UNC education is lively, filling the senses and getting to the essence of what life can truly offer. Our path to discovery recognizes that the journey is just as important as the destination. Along the way, we work hard to bring out the best in ourselves and one another.

You'll see it in our classrooms, in our community and in the lives of our students, faculty, staff and alumni.

In sum, we call it bringing education to life.
